# 1 Typesetting instructions – Summary

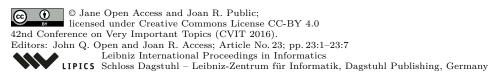

LIPIcs is a series of open access high-quality conference proceedings across all fields in informatics established in cooperation with Schloss Dagstuhl. In order to do justice to the high scientific quality of the conferences that publish their proceedings in the LIPIcs series, which is ensured by the thorough review process of the respective events, we believe that LIPIcs proceedings must have an attractive and consistent layout matching the standard of the series. Moreover, the quality of the metadata, the typesetting and the layout must also meet the requirements of other external parties such as indexing service, DOI registry, funding agencies, among others. The guidelines contained in this document serve as the baseline for the authors, editors, and the publisher to create documents that meet as many different requirements as possible.

Please comply with the following instructions when preparing your article for a LIPIcs proceedings volume.

# Minimum requirements

- $_{\rm 32}$  Use pdflatex and an up-to-date LATeX system.
- Use further LATEX packages and custom made macros carefully and only if required.
- Use the provided sectioning macros: \section, \subsection, \subsection, \paragraph\*, \paragraph\*.
- Provide suitable graphics of at least 300dpi (preferably in PDF format).
- Use BibTeX and keep the standard style (plainurl) for the bibliography.

<sup>&</sup>lt;sup>1</sup> Optional footnote, e.g. to mark corresponding author

## 23:2 Placeholder title: Formal methods in constraint-based learning

- Please try to keep the warnings log as small as possible. Avoid overfull \hboxes and any kind of warnings/errors with the referenced BibTeX entries.
- Use a spellchecker to correct typos.

# 1 Mandatory metadata macros

- Please set the values of the metadata macros carefully since the information parsed from these macros will be passed to publication servers, catalogues and search engines. Avoid
- 44 placing macros inside the metadata macros. The following metadata macros/environments
- 45 are mandatory:
- 46 \title and, in case of long titles, \titlerunning.
- 47 \author, one for each author, even if two or more authors have the same affiliation.
- 48 \authorrunning and \Copyright (concatenated author names)
- The \author macros and the \Copyright macro should contain full author names (especially with regard to the first name), while \authorrunning should contain abbreviated first names.
- 52 \ccsdesc (ACM classification, see https://www.acm.org/publications/class-2012).
- s₃ \keywords (a comma-separated list of keywords).
- Trelatedversion (if there is a related version, typically the "full version"); please make sure to provide a persistent URL, e.g., at arXiv.
- begin{abstract}...\end{abstract}...

## 57 Please do not ...

- $^{58}$  Generally speaking, please do not override the lipics-v2021-style defaults. To be more
- specific, a short checklist also used by Dagstuhl Publishing during the final typesetting is
- $_{60}$  given below. In case of **non-compliance** with these rules Dagstuhl Publishing will remove
- the corresponding parts of LATEX code and replace it with the lipics-v2021 defaults.
- In serious cases, we may reject the LaTeX-source and expect the corresponding author to revise the relevant parts.
- Do not use a different main font. (For example, the times package is forbidden.)
- Do not alter the spacing of the lipics-v2021.cls style file. ■
- Do not use enumitem and paralist. (The enumerate package is preloaded, so you can use \begin{enumerate}[(a)] or the like.)
- Do not use "self-made" sectioning commands (e.g., \noindent{\bf My Paragraph}).
- 69 Do not hide large text blocks using comments or \iffalse ... \fi constructions.
- Do not use conditional structures to include/exclude content. Instead, please provide only the content that should be published in one file and nothing else.
- Do not wrap figures and tables with text. In particular, the package wrapfig is not supported.
- Do not change the bibliography style. In particular, do not use author-year citations. (The natbib package is not supported.)
- This is only a summary containing the most relevant details. Please read the complete document "LIPIcs: Instructions for Authors and the lipics-v2021 Class" for all details and don't hesitate to contact Dagstuhl Publishing (mailto:publishing@dagstuhl.de) in case of questions or comments: http://drops.dagstuhl.de/styles/lipics-v2021/
